## ABOUT ME

I started programming when I was 12 and entered the world of the web at the age of 18. During all these years of coding, reading, and communicating, I have learned that a great developer is not someone who writes magical code but someone who communicates, prioritizes, and writes clean and self-explanatory code for other developers to easily understand.

I always try to keep myself updated and deliver high-quality code on time through effort and communication.

## WORK EXPERIENCE

### Zalando | Full-time Frontend Engineer

Mar. 2022 – Now  
zalando.de

Zalando is the starting point for fashion in Europe

**Responsibilities:** Front-End engineer in Partner Tech, facilitating the communication between Zalando and suppliers.

**Achievements:** I actively joined and presented in the community meetups, I have driven a few projects, some of them proactively. I created alerting and monitoring for all of the applications. I ran a hacktivity which affects multiple teams and removes the need for a back-end, reducing system load and costs. I offered a standard for code review in the team, inspired by google's code reviewers' guide. I wrote a post-mortem and attended architecture guild meetings. I proactively automated a few tools used internally by the team. I was chosen to be a trainer in a zalando-wide training course, a11y for engineers. I found out problems with flaky tests and fixed them. I added sentry with source maps for all of the applications, enabling us to hunt the bugs. I fixed a few problems with package management and package discrepancy among different systems. I also removed redundant resources from k8s cluster that caused a few domains to be inaccessible.

### Mobilab Solutions GmbH | Full-time Frontend Developer

Sep. 2021 – Jan. 2022  
Jul. 2020 – Aug. 2020  
mobilabsolutions.com

Mobilab is a software engineering agency based in Cologne, Germany.

**Responsibilities:** Developing the front-end (and sometimes the node.js backend) of the client "stadtenergie" with 40,000 users.

**Achievements:** I listed syntactic and performance problems in the current codebase and found solutions for them. I tried to improve the code quality and code review mechanism and therefore the quality of code improved I also made a chrome extension that turns Jira ticket names into git branch names. In 2020, I worked with this company as freelancer, and later I was invited to move to Germany and work as a full-time developer. The project has started two years ago and in three months, I have more than 100 PRs (800 PRs in total).

### Cafebazaar Cloud (Sotoon) | Full-time Frontend Engineer

Dec. 2020 – Aug. 2021  
sotoon.ir

By providing smart technologies, Sotoon enables developers and businesses to focus only on developing what differentiates their products or services.

**Responsibilities:** Developing the front-end of an annotation and ASR tool using Vue.js.

## EDUCATION

### University of Tehran

Sep. 2012- Feb. 2018  
Mechanical Engineering  
With the rank of 319 amongst +260,000 candidates in the National University Entrance Exam (Konkour)

## SKILLS

**Technical:** JavaScript (Event-Loop and async calls, Microtask and promises, execution stack, closures, scope chain, prototype chain, this binding, DOM, Service Workers, PWA, Variable scopes and hoisting, SSR, JWT, Isomorphic JS, Observers), TypeScript, Webpack, ESLint, Tailwindcss, CSS Modules, React (suspense, hooks, ...), Redux, Redux Saga, Vue.js, Next.js, Node.js (express), HTML, CSS (animations and transitions, stacking context, specificity, ...), jQuery, SASS, REST API, OWASP top 10, CORS, CSRF, Cookies, Jest, Git, Micro Front-Ends, grafana, opentelemetry, babel, graphql.

**Familiar With:** docker, kubernetes

**Collaboration:** Proactive, Detail-Oriented, Flexible.

## LANGUAGES

**English:** Fluent

**German:** Medium

**Persian:** Native

**Achievements:** I designed many new components and fixed a lot of technical debts. I also refactored the code and broke the components into small pieces to improve the maintainability of the code. I worked with two teams at the same time. One of my most important achievements in this company was creating an advanced logger which based on the batch size and time, sends the logs to the server.

## Toggl Hire | Contract

Dec. 2020 – Mar. 2021

[toggl.com/hire](https://toggl.com/hire)

Toggl Hire is on a mission to revolutionize the way hiring happens. I worked with this company as a freelance expert and made several batches of JavaScript and PHP questions for the platform. The work was admired several times by the reviewers.

## lyft.ir | Full-Stack Developer

Feb. 2019 – Jun. 2020

Lyft was a startup with the same business model as Airbnb Experiences', but more diverse in types of supported events.

**Responsibilities:** I was the only developer of this startup and created the whole system.

**Achievements:** The PageSpeed score of the website was A (96%).

Techs used in this project: React, Redux, Redux Thunk, Material UI, Socket.io, Advanced real-time seat selection system. QR-code ticket scanner which was instantly synchronized between all ticket-checker devices. Service workers to make the app offline-first. Particularly, the ticket-checker page could work offline and send the data to the server as soon as there was an internet connection.

## Snapp-Box | Contract Full-Stack Developer

Sep. 2018 – Dec. 2018

[snapp-box.com](https://snapp-box.com)

**Responsibilities:** Full website developed, react for front-end and WP-Rest for back-end.

**Achievements:** I worked so closely with the product owners and delivered high quality and highly customizable website. It is a react application with the PageSpeed score of A (90%).

## Begoody | Full-Stack Developer

Sep. 2017 – May. 2018

Begoody was a startup, facilitating hairdressers and beauty salons appointments with a great online interface.

**Responsibilities:** I was the only developer of the team and created the whole application.

**Achievements:** In a short time, I created an application using Laravel framework with an advanced calendar exactly like Google Calendar, and a smart free time-slot finder to help the hairdressers use their time at its best.
